

Certificate

SAP INTEGRATION CERTIFICATION

SAP SE hereby confirms that the interface software **ERPIS 400_700** for the product **ShipERP 4.1** of the company **ERP Integrated Solutions, LLC** has been certified for deployment on SAP ECC 6.0 via the SAP integration scenario **ABAP Add-On Deployment for SAP Enterprise Resource Planning**.

This certificate confirms the technical compliance of **ShipERP 4.1** with SAP certification procedures.

The certification test is documented in report no. **20181** and expires on **April 14, 2025**.

SAP Test System: SAP ECC 6.0

The certification is listed on the SAP Certified Solutions Directory: sap.com/csd.

Certified Functions:

- Assign Software Component and Namespace
- Package Add-On using SAP Add-On Assembly Kit
- Deploy using SAP Add-On Installation Tool (SAINT)
- Integration with SAP Enterprise Resource Planning
- Technical Uninstallation Test
- SAP Solution Manager Ready functionality

Palo Alto, April 14, 2022

SAP® Certified
Integration with SAP NetWeaver®

THE BEST RUN 

SAP certification focuses on technical integration with SAP solutions. Vendor is responsible for the product itself, its error-free operation, and adherence to applicable laws.

Interface Certification: Test Report

ABAP Add-On Deployment for SAP Enterprise Resource Planning

Interface Certification: 20181

SAP ICC Integration Scenario	ABAP Add-On Deployment for SAP Enterprise Resource Planning
SAP Product incl. Release used for Test	SAP ECC 6.0
SAP Solution	SAP Enterprise Resource Planning

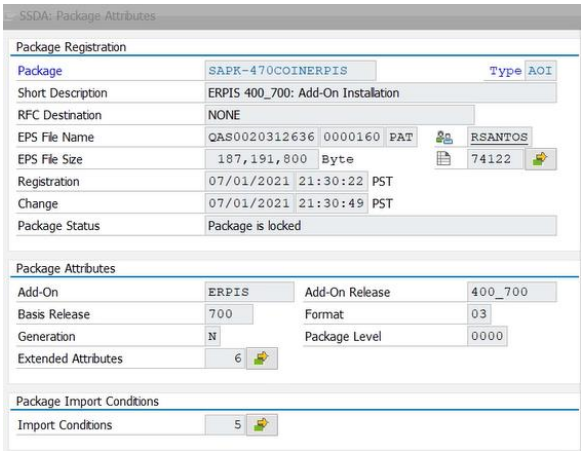

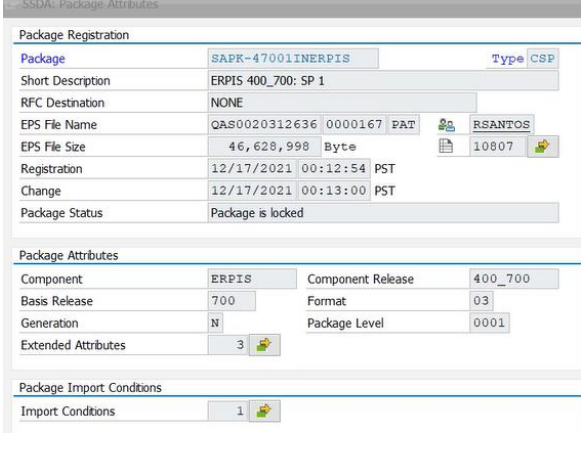

Vendor Name	ERP Integrated Solutions, LLC
Vendor Number	918420
Vendor Product Name & Release	ShipERP 4.1
Vendor Interface Name & Release	ERPIS 400_700
Operating System of Vendor Test System	Linux
Tools used for the Technical Integration	
Language Version Tested	English
Certification Date	April 14, 2022
Expiration Date	April 14, 2025
Location	Palo Alto
Person Present - Vendor	Richard Santos
Person Present - SAP	MaiAnh Chu-Nguyen

Certified Functions:

**Assign Software Component and Namespace
Package Add-On using SAP Add-On Assembly Kit
Deploy using SAP Add-On Installation Tool (SAINT)
Integration with SAP Enterprise Resource Planning
Technical Uninstallation Test
SAP Solution Manager Ready functionality**

1. TECHNICAL PRODUCT INFORMATION

Product information	
Product/Company web page:	https://shiperp.com/
Product is certified for:	SAP ECC 6.0
Support contact information:	support.erp-is.com

ABAP Components of the Solution	
Following PAT file(s) and Software Component Versions belong to the Add-On solution and were deployed successfully:	
List of PAT Files:	List of Software Component Versions: ERPIS 400_700
	
	
Comments:	

External Components of the Solution

Is there an external component, not written in ABAP, but integrated with the Add-On and belonging to the standard shipment of the solution?

- ☐ Yes
☒ No

Integration with other SAP Solutions through REST / oData**Transfer of Application Interface Register Key (AIR Key)**

If ABAP Add-On integrates with other SAP Solutions through REST APIs or oData services using http/http(s) communication protocol, then the transfer of AIR Key must be implemented

Integration through REST APIs / oData services and AIR Key transfer implemented.

- ☐ yes
☒ no

AIR Key value

N/A

Compatibility with SAP S/4HANA Cloud, private edition

Confirmation below was given to SAP by the vendor.

☐ yes, ABAP Add-On is compatible with SAP S/4HANA Cloud, private edition, because:

- Add-On does not require operating system-level access.
- Add-On does not have dependencies on additional components outside the ABAP stack, but within the S/4HANA Cloud environment.

☐ no, ABAP Add-On is not compatible

☒ no, because this certification is not valid for SAP S/4HANA

2. FUNCTIONAL OVERVIEW

Supported Functions and Business Processes – General Description	
Overview on the functionality and the purpose of the 3 rd party product.	
ShipERP is a Certified multi-carrier shipping solution facilitates all forms of shipping including Small Parcel, Less than a Truckload (LTL), and full Truck Loads (TL).	
o	* One Single SAP Shipping Platform
o	* Integrates with all major carriers
o	* Real-time shipment creation

3. PRODUCT IMPLEMENTATION

3.1 List of used SAP objects

The list below has been given to SAP by the Vendor, for reference purposes.
SAP cannot guarantee that it's a complete list.

List of used SAP Function Modules / BAPIs / RFCs / IDocs / Classes ... or other SAP building blocks
--

WS_DELIVERY_UPDATE
BAPI_HU_CREATE
HU_PACKING_REFRESH
HU_PACKING_INITIALIZE

FORMAT_MESSAGE
MAP2E_VEKPV_B_TO_BAPIHUHEADER
HU_GET_HUS
HU_HEADER_UPDATE

HU_POST
RV_SHIPMENT_VIEW
HU_PACKING_AND_UNPACKING

4.1 Performance and Scalability

Overview on the architecture and design of the product including performance and scalability.	ShipERP is 100% abap solution and utilizes web services to leverage shipping carrier functionality. The web services can be made directly from ECC to the carrier and also can go through XI/PI. Performance is dependant on HTTPS traffice and the size of carrier's systems. Typically it takes 2-3 seconds to print labels
---	---

4.2 Quality Assurance

Overview on Quality Assurance procedures from the vendors to assure that the interface design and performance consistently conform to specified requirements.	Before releasing a support package, ShipERP is installed in the Delivery system. All ShipERP functionality is tested in the delivery system before the package is released.
The following quality documents exist:	
Test Plan Documentation	<input type="checkbox"/> yes
Test Report Documentation	<input type="checkbox"/> yes
Benchmark Results Documentation	<input type="checkbox"/> yes
Comments	

4.3 Security

The Add-On Development Lifecycle ensures security	OK
The Add-On does not contain any Cross-Site Scripting (XSS) vulnerabilities	OK
The Add-On does not contain any memory corruption vulnerabilities	OK
The Add-On does not contain any SQL or other data query and manipulation language injection vulnerabilities	OK
The Add-On does not contain any Path Traversal vulnerabilities	OK
The Add-On does not contain any intentionally hidden and non-documented features that circumvent security measures (backdoor)	OK
Comments:	

5. SOFTWARE PRODUCT ASSESSMENT

5.1 Check Documentation

Functional Documentation	<input checked="" type="checkbox"/> yes
Installation Documentation	<input checked="" type="checkbox"/> yes
Maintenance Documentation	<input checked="" type="checkbox"/> yes
End User Documentation	<input checked="" type="checkbox"/> yes
Uninstallation Documentation, according to SAP Note 1883223 .	<input checked="" type="checkbox"/> yes
Comments :	

6. TEST CASES

6.1 Checks performed by the Add-On Assembly Kit (AAK)	
Invalid objects	OK
Existence of objects and table entries to be delivered	OK
Assignment to namespace	OK
Delivery of CVERS entries (R3TR VERS) not possible	OK
New objects (entries) in Support Package/CRT	OK
Table entries (check if delivery-relevant/delivery behavior)	OK
Assignment to development class and software component	OK
Table entries in customer name range (protected: TRESC)	OK
Included AAK Log of Performed Checks	<input type="checkbox"/> yes <input checked="" type="checkbox"/> no
Comments: No log included, because everything was ok.	

6.2 Technical Uninstallation Test	
Add-On can be uninstalled	<input checked="" type="checkbox"/> yes

Without special precautions, the uninstallation leads to a complete **removal of all data and tables** that were created and implemented with the Add-On in the system. In this case, it is in the responsibility of the Add-On supplier together with the customer, to save the data that is legally relevant and should not be deleted. In addition, it can be useful to perform a system copy in advance and/or to create a backup.

The handling of data that was created with the Add-On has neither been checked explicitly, nor certified.

After deployment, Add-On is displayed in transaction SAINT as “uninstallable”	OK
Vendor provides a detailed uninstallation documentation, including: <ul style="list-style-type: none"> A list of workbench objects that need to be handled manually The handling of data that was produced with the Add-On 	OK
Add-On was successfully uninstalled after the deployment, i.e. the objects located in vendor’s namespace were deleted.	OK
Comments:	

6.3 Describe test steps to be executed during functional test

The test cases below were executed to check that the Add-On could run without problems in the SAP environment. SAP does not validate or confirm the correct functionality of the Add-On.

All test cases below were executed successfully:

1 Rate small parcel package

2 Address Validation

3 Ship small parcel package

4 Track a small parcel package

5 Cancel Small parcel shipment

7. PARTNER CONFIRMATION

Partner states that by following the guidelines of the ICC Integration Assessment or ICC Integration Guide, only the integration technologies listed in this document are used in the described interface software.

ABAP Add-On Deployment Certification is only valid for the SAP release and partner product release noted in this document; in the event of SAP **or** partner release changes SAP offers re-certification of the interface software.

The partner solution **has not been deployed or tested on SAP Solution Manager** as part of the certification procedure. It's therefore not "certified for SAP Solution Manager".
